

Impressions of ASUE outgoing students studying at ASUE partner universities and incoming students to ASUE

Arman Sargsyan

*Department of Regulation of
Economy and International
Economic Relations,
Master`s degree*

"Erasmus + is a lifelong experience that everybody who strives for an excellence should have! It is full of cultural and international diversities, hence, a brilliant way to observe new cultures, customs and languages.

Erasmus gave me a huge network, a lot of friends and unforgettable memories. I got a chance to advance and shape my professional and academic knowledge by being a part of this community. Now I stand as a young professional who is ready to enter professional world and overcome any obstacles"

Mary Avanesyan

*Department of Marketing and Business
Management, Bachelor degree*

"I am Mary Avanesyan and I study at Varna University of Economics. I want to say, that a good opportunity was granted to us to be a participant of Erasmus+ exchange program. A new environment, new people, new acquaintances have been created for us. Especially I like the university, since there are

new study approaches and I hope to return to my home country with new knowledge".

Hakob Hakobyan

*Department of Management,
Master's degree*

“At Tartu University I was given an opportunity not only to enhance my knowledge, but also to be brave and self-dependent in presenting my initiatives. Of course in this issue my lecturers and more experienced students helped me a lot. Study methods also help very much, the main objective of which is to

motivate students to study. I also stress the importance of language knowledge which has its direct impact on the learning outcomes”.

Amalia Jaghatspanyan

Department of Finance, Bachelor degree

About the university I can say that the program was organized very well. Right from the start we were included in different events both educational and entertainment, and by this they did not let us think that living in foreign country can seem to be sad and difficult. Regarding the activity of the university I can say that the lessons are very interesting, the lecturers are very skilled and

besides theoretical knowledge they also present their experience and give very useful advice. In the main building of the university every day different organizations present their stalls and their products to the people who are interested. They even present different types of internship either to foreigners or to the local people, or offer to participate in different case championships. In short, a lot of opportunities are offered to students for deepening and increasing of the knowledge in their profession. I am very happy and grateful indeed, that I was given the chance to study for half a year in this university.

Zohrab Mazmanyany

Department of Marketing and Business Management, Master's degree

I liked Poland with its forests, unique architecture and hospitable people. Bialystok University of Technology hosted me warmly and right from the first day I got used to the life and university there thanks to the operative work of the representatives of foreign

relations division of the Host University and ESN PB Office, which is made of university volunteer students. The lessons here are organized very well settled to the students, generally online. Lecturers know English, which increases the quality of lessons. Some kinds of lessons take place, where students can present their history, culture, kitchen and the current economic situation. Starting from the first day foreign relations division and ESN PB Office organized for us interesting tours in Bialystok and around whole Poland, as well as different competitions and events. During these 2.5 months I managed to visit the following cities and villages of Poland; Warsaw, Suchowola, Tykocin, Supraśl, Kleocin, Łódź. Suchowola is the heart of Europe, where by the solicitation of Foreign relations division I together with students from Malaysia, Serbia and Russia were invited to present the picturesque places and culture of our country in English and Russian, speak to pupils about the importance of knowing foreign languages and at the end we received certificates for the participation which took place on Language day, which is on April 4th. After that Krustof Lech, the director of the school invited us to dinner. On 27th of April together with several students, as the winners of the competition on logo design organized by foreign relations division, we are going to Warsaw on the tour organized by them, as well as to watch Mama Mia musical, for what I want to express my gratitude to foreign relations division. At students hostel we live in a very amiable and warm atmosphere with other students from Asia and Europe.

Nelly Potikyan

Department of Regulation of Economy and International Economic Relations, Master`s degree

I want to express my deepest gratitude to my University, especially to the representatives of foreign relations division for their perfectly done work. Here we will have very comfortable and well equipped hostel, a teaching staff formed of professionals; students arrived from different countries, new country, new culture and unforgettable 4 months of exchange of experience. I think that the advantages granted by this program will not end with my arrival to my home country, but they will direct us during our whole life, in our professional growth.

Siranush Hovhannisyan

Department of Accounting and Auditing, Bachelor degree

Erasmus+ program granted me and the other students an opportunity to study abroad. Here the study process gives a chance to use effectively an hour specified for a lesson. I also had the chance to travel in different European counties. Thanks to this program I got a lot of new friends from different parts of the world.

Davit Vardanyan

*Department of Finance,
Bachelor degree*

I have never imagined what a wonderful opportunity it is to study abroad. I had the chance not only to get acquainted with Greek culture, lifestyle and history, but also to get a lot of new friends from different countries. The biggest achievement from the exchange program was the

learning in depth of professional courses at Athens University of Economics and Business. I hope that more students will have an opportunity to participate in Erasmus+ program, since it is a significant experience, being a beneficiary of which is indeed very joyful.

Arthur Karapetyan

*Department of Regulation of
Economy and International
Economic Relations, Bachelor
degree*

Rima Kharatyan

*Department of Regulation of
Economy and International
Economic Relations, Bachelor
degree*

Satenik Kalantaryan

*Department of Accounting and
Auditing, Bachelor degree*

Vahe Barseghyan

*Department of Marketing and
Business Management, Bachelor*

degree

Thanks to Erasmus+ program together with my 4 friends visiting Stefan cel Mare University of Romania we explored a new and very interesting environment for us, competent and humane lecturers, active and full educational system. It was somewhat unusual to listen and understand the lectures in foreign language during the first study week, but the perfect motivation of students by the lecturers and the environment helped us to get used to the changes quite easily and quickly. I am sure, that the knowledge and experience received here will make me a more competitive and intelligent professional. I am grateful to ASUE for providing us this unchangeable and important opportunity.

Anna Khachatryan

Department of Accounting and Auditing, Bachelor degree

I am Anna. During 2015-2016 academic years I was informed about Erasmus+ program, which gives an opportunity to ASUE students to study in Europe. I have decided to try and I am among those students who will go to study abroad. The program gave me an opportunity to enhance my knowledge of English both in professional and speaking level, as well as to contact with the representatives of foreign nations.

The months that I spent in the framework of Erasmus+ program are the most memorable. It was my first experience in such a program, and I am very grateful to my university for the provided help.

Satenik Yegoryan

Department of Marketing and Business Management, Bachelor degree

The first thing that I want to say is that Erasmus + program is the best thing that can happen in the life of a student. Studying in Poland first of all I learnt a lot of things about Polish culture and customs. Differences between Polish people and Armenians are

quite a lot. Differences exist also in educational system. Studying for 5 months at Poznan University of Economics I was a participant of the educational system innovations and effective methods of Polish education. The partners of ASUE at Poznan University of Economics contributed also to the successful completion of the program being very eager to help me in every issue.

Silviu Cugut

Ștefan cel Mare University of Suceava (Incoming student to Armenian State University of Economics) Master's degree

Barev dzez, vonz es? I will never forget. It feels to be a wonderful experience. ASUE is a very good university with a very nice teaching staff. I will never forget semester spent in Armenia, I had the opportunity to get acquainted with a lot of nice people, I visited a lot of tourist attractions and I tasted traditional Armenian dishes. I hope to return in the near future, because I have

not proved to taste Armenian peaches. I recommend this destination, do not be afraid!
