

Universities grow stronger by enhancing knowledge exchange and collaboration with their counterparts domestically and internationally. In a world with less physical mobility, how can we continue to support international academic collaboration? Will the world's databases be open to more groups of scientists and researchers as a result of COVID-19? Join us to explore the different ways universities, scientists, and researchers can still work closely together, even in times when travel is limited.

Speakers:

\* Prof. Carole Mundell, Chief Scientific Adviser, Foreign and Commonwealth Office

\* Prof. Andrea Nolan, Principal & Vice Chancellor, Edinburgh Napier University

\* Aliya Sembayeva, Founder and President of Kazakhstan PhD Association

\* Timothy Brundle, Director of Research & Impact, Ulster University

\* Moderator Dan Shah, Director of Research and Policy Insight, British Council
